# 🍳 Tartan Eats

Team 17

Team member: Chuchu Wu, Kun Liu, Ke Ning, Yanjun Wang

Background

Tartan Eats is a food order application where customers can order food from nearby restaurants. There will be three client ends: one for customers, one for restaurants, and one for driver (delivery).

Sprint1 - Goals

Original goals & Work Allocation:

- Registration (Chuchu Wu, Ke Ning)
- Login (Chuchu Wu, Ke Ning)

- Restaurant Profile (Yanjun Wang)
- Restaurant Order List (Yanjun Wang)

- Customer Account (Kun Liu)
- Global Restaurant Page (Kun Liu)
- Single Restaurant Page (Kun Liu)

Sprint1 -   Current Progress

Completed:

- Model design and ER diagram

  https://www.figma.com/file/v6ujGyrw17nII6IL2Mfl2M/Tartan-Eats?node-id=0%3A1

- UI design (18 sketches in total)

  https://www.figma.com/file/BzQzAaH7RMRcM2F5DhAZuA/Food-Delivery-Landing-Page-%F0%9F%8D%95-(Community)?node-id=0%3A1

- Registry and Login Feature

      (Demo)

- Partial pages of Customer Module and Restaurant

      (Demo)

Encountered Problems

- How to Integrate Google Map API
- Model design for Multiple types of Users
- Adjust CSS according to UI sketches

Sprint 2 - Plan

- Restaurant side 1 person :
    - Add menu, edit profile
- Customer side 2 person :
    - View restaurant list, menu list,
    - Add to shopping cart (Ajax)
- Driver side 1 person:
    - Edit profile
- Improve front-end layout according to the UI sketches
